Arnab Das

Kolkata, India | arnabdas18@gmail.com | +918335006511 | Arnab Das | mingrogue

Skills

- NodeJS, Python, Typescript, No-SQL, SQL, Docker, Serverless, Microservices, Redis, RabbitMQ, Confluent Kafka, KSQL, Prisma, Express, NestJs, Git, ADF, JWT Authentication and Authorisation, ORM Frameworks, Azure Services (Service Bus, Functions, APIM, Event Hub, Search Index, Blob), AWS (SNS, SQS, Lambda, API Gateway, DynamoDB, S3)

Experience

PwC India, Senior Associate — Kolkata, India — 03/2023 - present

- Taking charge of ingestion, transformation and provisioning of data from several PwC systems into one common platform at scale. Increasing data availability by 80% with REST API. (Data Engineer with Backend - project Teambuilder)
- Taking ownership of Confluent Kafka and architecting new features into Invoice Management PwC application used by 500+ active users. Making backend query performance 50% more time effective. (Full Stack Developer - project Request IT).
- Spearheading deployments for Confluent Kafka, engaging and communicating with teams from other entities (TCS and Infosys).

Pursuit Software, Senior Backend Developer NodeJS — Kolkata, India — 09/2020 - 02/2023

- Implemented cloud based in-house product solution from scratch which enables health care researchers to work with healthcare data. Enhancing the searching solution time by 50%.
- Migrated software system into Azure stack incorporating message queues rather than REST APIs. Cut down timeout errors by 100%. Independent contributor. Created architecture design for migration.
- Secured applications with Azure AD SSO. Lead team of 4 freshers and gave training to support and develop applications.

ORMAE, Backend Developer Consultant — Pune, India — 05/2020 – 08/2020

- Single handedly wrote the whole API layer from scratch. Formulated codebase into separate scalable containerized microservice modules. Integrated with Whatsapp API.
- Used RabbitMQ to communicate with different microservices, Redis as a caching layer, Minio as free file storage engine, JWT Auth. Wrote Docker images for each microservice and also a docker-compose for dev deployment environment.

Kavyant Technologies, Back End Developer — Kolkata, India — 08/2019- 06/2020

- Wrote several Python scripts to organize large unstructured data (10 GB) into small text files. Sentimental Analysis, Tesseract OCR to extract text from prescription images.
- Added all extracted data to MongoDb cluster. Created admin panel with NodeJS.

KPIT Technologies, Software Developer Trainee — Pune, India — 04/2018 – 05/2019

- Developed a Test Automation Framework POC using Python. Increased testing time efficiency by 90% and improving efficiency of QA.

Backend Developer

- Experienced backend developer with 6 years of experience in developing and maintaining high-performance systems. Ability to develop end to end scalable systems using microservices architecture, message queues and caching systems with containerization. Able to provide clean, modular, restful services using Azure, AWS and GCP. Strong collaborator with a track record of delivering on-time and on-budget projects and initiatives. Critical thinker, self motivated, creative thinker and effective communicator.

Education

M.Tech	**IIT ISM Dhanbad**, Electronics and Communication Engineering	06/2017 - 07/2019
B.Tech	**Techno India Salt Lake**, Electronics and Communication Engineering	06/2011 - 07/2015
H.S.	**B.D.Memorial Institute**	2009 - 2011
10th	**B.D.Memorial Institute**	2009

Projects

Shakehands - Feyntech Systems 2022

- Migrated the database of Indian website with +1lakh users, for anything related to pet products from Magento to Shopify. (NodeJS, Shopify API, MySQL, EC2, pm2).

GAIA Platform - Neoma.ai 2022

- Created automated backend service workers which took data from sensors and populate data into DynamoDb tables. Implemented several Rest API for hospitility sector. (NodeJS Serverless, AWS Api Gateway, Amazon SQS, DynamoDB, AWS Lambda, AWS Cloudfront, Amazon S3)

Metro Laundry - ULTERA Systems 2021

- Developed laundry management system backend which is incorporated by Saudi Clients in UAE and Oman. It had 200 plus active users. (NodeJS, PostgresSQL, Prisma, Typescript, Docker).

Maa Durga VR - Spaceshif 2020

- Crerated admin portal for content management system in AWS serverless stack. (NodeJS Serverless, MongoDB, AWS Api Gateway, Amazon S3, AWS Cloudfront, AWS Lambd).

Certifications

Microsoft Azure Developer Associate Credential ID 192-2746

Technologies

Languages: JavaScript, Typescript, Python, Go, SQL, NoSql

Databases worked with: PostgreSQL, MongoDB, MySQL, SQL Server, DynamoDB, Redis, Elasticsearch, Firebase, Google Big-query, Firebase.

Message Queues: Azure Service Bus, Amazon SQS, Event Bridge, RabbitMQ, Kafka.

Data Engineering Platform and Streaming Platforms: Azure ADF, Databricks, Confluent Kafka
